Design in Your Hands

inspired by children's building blocks

Modular Furniture Concepts is a quality stackable system of pre-assembled open boxes with options for doors, drawers and shelving. It is a storage system ideal for the home, office, retail and new hybrid environments.

Inspired by children's building blocks, the MFC encourages a freedom to move and create new formations with ease. A furniture design in your hands to help transform your space with unlimited flexibility.

lightweight, sustainably-grown material

Modular Furniture Concepts is constructed from an ultra-lightweight Italian poplar plywood, a uniquely strong, sustainably-grown material. Wood veneers and finishes are available in a variety of choices including Walnut, Birch, Cherry, Pine and Oak. Color finishes can be matched to your imagination.

The ergonomic hand pull is made from solid wood, positioned on the left, right or center and integrated into the face of the door and drawer. We utilize a long-standing European 32 mm system for glides, hinges and shelving, with quality hardware options from Blum and Häfele.

a platform for an evolution in modular design

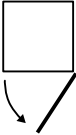

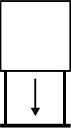

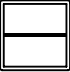

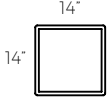

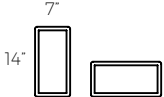

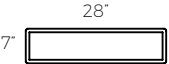

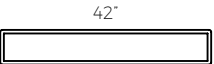

Modular Furniture Concepts is inspired by the classic modernist styles of mid-century Scandinavian furniture, Bauhaus design and Japanese handcrafted woodworking, with three generations of interior design and custom furniture-making experience.

MFC is a furniture system and a platform for the evolution of modular design, an applied philosophy of aesthetic, ergonomic, quality-crafted solutions for shaping our changing environment.

Estimated Pricing

Variables include final materials, finishes and hardware. Sizes can be customized.

				
	\$150	+\$45	+\$55	+\$15
	\$100	+\$35	+\$35	+\$15
	\$175	+\$60	+\$65	+\$25
